OS X WORKFLOW TRAINING

STUDENTS	FEES*
1	\$279
2	\$399
3	\$539
4	\$669
5 or more	\$799

You've invested in the products and support – now make sure the users are high functioning too. Decrease the time you (or your employees) spend locating files, waiting for files to transfer, to render, to open, to save, to convert, to print and keep your data and creativity flowing. This 3-hour course gives you valuable information from the best workflow specialists in the industry. Learn how you can use your operating system to increase productivity and expand your knowledge base quickly and effectively.

*Includes course materials for five students. For six or more, please add \$30 per additional participant. All pricing is subject to change. Groups of three or more require a conference room and projector. Training and course materials are not covered under service plan hours.

Training courses can be held at your location to minimize user down time, solve specific workflow issues and allow for post-class service. Call us today to schedule!

CUSTOMIZED TRAINING

Do you need training for design and production applications, Mac or PC server integration, media asset management or virtually any other subject that can impact your productivity? With our extensive knowledge base and partnership with an array of industry professionals, we will provide or point you to the best resource to keep your business running smoothly.
